Personal Statement:

I am a team-oriented, goal-driven, full stack developer experienced in JavaScript, Ruby on Rails, Django, and React, with a side passion for history. I love programming because it is a lot like history; individual lines of code may seem small and insignificant, but each line has a unique impact on the larger program, similar to events in our own lives. Those events develop us into who we are, just like each line of code shapes the program.

SKILLS:

Full Stack Development | JavaScript | ES6 | Express | jQuery | Node.js | HTML5 | CSS3 | JWT Authentication | React | MongoDB | Mongoose | Ruby | Ruby on Rails | Postman | PostgreSQL | SQL | API Requests | Flexbox | Git | GitHub | Heroku | Python | Django | React Native | Vercel | Gatsby | Bootstrap | Jira

Other Professional SKILLS:

Adobe Acrobat | Fork Truck License | Formally licensed in Series 6 and Series 63

PROJECTS:

Board Game Collection: <https://digital-shelfie.herokuapp.com/> September, 2020

- A database app that allows users to login, search for board games, and add them to their collection
- Technologies Used: HTML, CSS, Bootstrap, JS, JQuery, Express, React, MongoDB, Mongoose, Heroku

Magic The Gathering Card Search App: - <https://magic-the-gathering-card-and-set-search.vercel.app/> August, 2020

- A searchable app that allows users to search for individual cards and view entire set's Card Image Galleries
- Technology Used: HTML, CSS, JS, JQuery, API Requests, Vercel
-

Group Project: Ubuntu - I am because we are : <https://practical-jones-b55cd9.netlify.app/> October, 2020

- A full CRUD application that allows users to improve their communities with community oriented events
 - Technologies Used: Bootstrap, Express, Flexbox, JWT Authentication, Milligram, Mongoose, Node.js, Postman, React
-
